

Rabbit-Resistant Plants

This list is not foolproof! If rabbits are hungry enough, they'll eat just about anything. If possible, protect all new plants with chicken wire for 30 days. Many thanks to Michelle Rauscher at the Desert Botanical Garden for her input!

Abutilon palmeri...Indian mallow

Agave species
(Although jackrabbits will munch on softer-leaved agaves)

Asclepias subulata...
Desert milkweed (Use a cage for young plants)

Aloe species

Antigonon leptopus...Queen's wreath vine

Artemisia species

Baccharis species

Baileya multiradiata...Desert marigold

Berberis species...Barberry

Buddleja marrubifolia...Wooly butterfly bush

Calliandra species
(Use a cage for young plants)

Caryopteris x clandonensis 'Dark Knight'...Blue mist

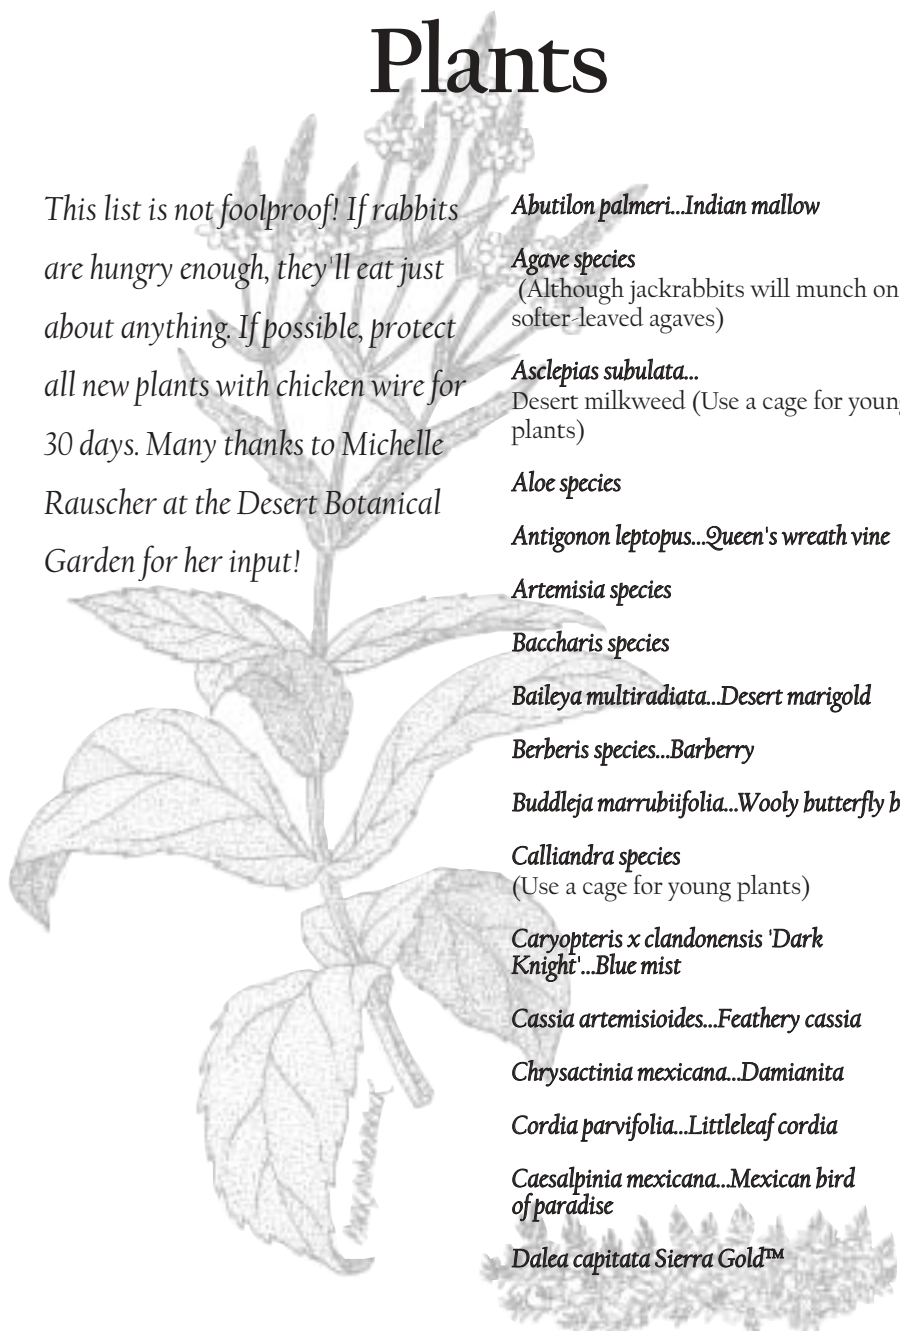

Cassia artemisioides...Feathery cassia

Chrysactinia mexicana...Damianita

Cordia parvifolia...Littleleaf cordia

Caesalpinia mexicana...Mexican bird of paradise

Dalea capitata Sierra Gold™

Justicia spicigera

Poliomintha maderensis, Lavender Spice™

Dalea frutescens Sierra Negra™

Dalea greggii...Trailing indigo bush

Dasyliiron species

Dicliptera species

Dyssodia species

Encelia farinosa...Brittlebush

Ericameria laricifolia...Turpentine bush

Erigonum species

Euphorbia biglandulosa...Gopher plant

Gallardia species

Gazania species

Hesperaloe species

Justicia species
(Use a cage to protect when young!)

Lantana species

Larrea tridentata...Creosote bush

Leucophyllum species
(Use 5-gal or larger for best results)

Melampodium leucanthum...Blackfoot daisy

Nolina species...Beargrass

Opuntia species
(Will sometimes eat new pads)

Penstemon species

Poliomintha maderensis Lavender Spice™

Ruellia peninsularis...Desert ruellia

Salvia species

Santolina species

Simmondsia chinensis...Jojoba

Sophora secundiflora...Texas mountain laurel

Tecoma stans...Yellow bells

Verbena species
(Young plants may be eaten)

Yucca species

Zauschneria californica...Hummingbird bush

Zinnia species
